Dear Sirs,

McCann Easi base – New Product Approval.

Having given due consideration to the use of F P McCann Easi-base pre-constructed manhole bases, and being aware that they have been assessed against the appropriate standard by WRc, and that other water companies have considered and approved them, I confirm that South West Water has no objection to their use or adoption in this region.

South West Water Limited therefore gives full acceptance for the installation of the McCann Easi – Base 1200 diameter precast manhole base within its operational boundaries, the product having been approved by WRc against certificate number PT/274/0808 (valid 28/8/08 to 28/8/13).

This acceptance is subject in all regards to conformity with the relevant edition of Sewers for Adoption (SfA) applying at the time, including installation. For clarity, we regard the current quality of benching in the product to be superior to that in SfA and therefore deem it to conform.

The above approval includes the implementation of our own works by our strategic partners provided that Company procurement rules are complied with.

Approval of the current product by South West Water Limited is valid with immediate effect until expiry of its WRc certificate (date 28th March 2013) or such time as it may become non-compliant with Sewers for Adoption or any subsequent publication or Regulation that replaces it.

Yours faithfully

John Perriam
Sewerage Management Strategist
