

FOCUS ON: EBRINGTON NEW ENTRANCE & BOUNDARY TREATMENT

projectupdate

Main Image: Ebrington At Night
Image Below: New Ebrington Wall Entry

Ebrington new Entrance and Boundary Treatment works included a new vehicle access off the Limavady Road with controlled pedestrian crossing points. The new entrance is framed on either side with entry walls with lit signage and landscaped beds. New granite paved footpaths framed with turfed grass and trees and LED street lighting. At the previous main entrance from St Columb's Road, Ebrington square has been created with 'The Amazing Space Peace Tree' 7m high sculpture at its centre. The sculpture created by local artist Maurice Harron features peace pledges on its leaves, lit by a flowing colour sequence of lights. The area also has seating and landscaping, with a number of distinct paving patterned areas using both high quality granite and high quality aggregate topped concrete pavers to accentuate the features in this area.
